What is Melatonin?

Melatonin (Mel-a-TOE-nin)

- Melatonin is a hormone and an antioxidant that is produced by the pineal gland in the brain and may be prescribed to patients who do not produce a sufficient amount on their own.
- Melatonin may regulate the sleep-wake cycle and hormone secretions in the body.
- Melatonin may also be used for other conditions as determined by your doctor.

Compounded Drug Forms: tablet, capsule, fast-burst sublingual tablet, troche, cream, suppository

What should I tell my health care provider before I take this medicine?

- Allergy to melatonin
- Pregnant or may become pregnant; are breastfeeding
- Have an autoimmune disease
- Have high blood pressure
- Have a bleeding disorder
- Have low blood sugar
- Have a seizure disorder
- Have low mood
- Have had an organ transplant
- Are taking other sedating medications
- Are taking a hormonal contraceptive
- Are at risk for falls

How should I use this medicine?

Follow the package directions provided by Belmar Pharma Solutions and by your prescriber. Your

dosage is based on your medical condition and response to therapy. Follow the dosing schedule provided carefully. This medication may be taken on an 'as needed' basis as well.

Oral dosage forms may be taken with or without food. If it upsets your stomach take it with a small meal. Pick a convenient time of day to take your dose and try to take your medication as close to that time each day as possible.

Sublingual formulations should be placed under the tongue or between the cheek and gums and held in place until fully dissolved. Avoid swallowing saliva to ensure best absorption into the bloodstream. Avoid eating or drinking 15 minutes before or after taking sublingual formulations.

Topical products can be applied to the inner arm, upper thigh, back of the knee, tops of the feet and inner wrists. It is recommended to rotate sites to ensure even retention of the hormone. Cover treated skin with clothes to avoid contact with people or pets.

Vaginal preparations should be inserted using your finger or the applicator provided. Suppositories may leak and may be more convenient to use at bedtime.

What if I miss a dose?

- If you miss a dose, take it as soon as possible.
- If it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule.
- Do not take double the dose at once.

What should I watch for while using this medicine?

Belmar Pharma Solutions recommends yearly checkups with your provider.

What side effects may I notice from receiving this medicine?

Possible side effects that may occur and may go away as your body gets used to the medication include:

- Daytime sleepiness
