

Nifedipine Compound

Published: March 1, 2026

What is Nifedipine Compound?

Nifedipine (Ni-FED-i-peen)

- Nifedipine is a calcium channel blocker
- It may be prescribed to address anal fissures.
- It may also be used for other conditions as determined by your doctor.

Compounded Drug Forms: cream, ointment, gel, suppository

What should I tell my health care provider before I take this medicine?

- Allergy to nifedipine
- Pregnant or may become pregnant; are breastfeeding
- Are taking medications for HIV, infections or seizures
- Are taking medication for high blood pressure or erectile dysfunction
- Are consuming grapefruit/grapefruit juice
- Are scheduled for major surgery
- Have heart disease or have had a recent heart attack
- Have liver or kidney disease

How should I use this medicine?

Follow the package directions provided by Belmar Pharma Solutions and by your prescriber. Your dosage is based on your medical condition and response to therapy. Follow the dosing schedule provided carefully.

Topical products can be applied to the inner arm, upper thigh, back of the knee, tops of the feet and inner wrists. It is recommended to rotate sites to ensure even retention of the drug. Cover treated skin with clothes to avoid contact with people or pets.

Rectal preparations should be inserted using your finger or the applicator provided. Suppositories may leak and may be more convenient to use at bedtime.

What if I miss a dose?

- If you miss a dose, take it as soon as possible.
- If it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule.
- Do not take double the dose at once.

What should I watch for while using this medicine?

Belmar Pharma Solutions recommends yearly checkups with your provider.

What side effects may I notice from receiving this medicine?

Possible side effects that may occur and may go away as your body gets used to the medication include:

- Headache
