

Progesterone Compound

Published: March 1, 2026

What is Progesterone Compound?

Progesterone (proe-JES-ter-one)

- Progesterone is a hormone derived from yams and may be prescribed to patients who no longer produce a sufficient amount on their own.
- It may be used to reduce the chance of endometrial changes in patients who are receiving estrogen therapy during/after menopause.
- It may be used to address uterine bleeding due to hormonal imbalance.
- It may be used to decrease the conversion of testosterone to DHT (dihydrotestosterone).
- It may also be used for other conditions as determined by your doctor.

Compounded Drug Forms: tablet, capsule, fast-burst sublingual tablet, troche, suspension, cream, gel, topical solution, suppository

What should I tell my health care provider before I take this medicine?

- Allergy to progesterone
- Pregnant or may become pregnant; are breastfeeding
- History of a recent miscarriage or a pregnancy outside of the uterus
- Undiagnosed severe vaginal bleeding
- Suspected, history of, or active cancer of the breast, ovary, cervix, or uterus
- History of blood clots, stroke, or heart attack
- Liver dysfunction or disease
- History of depression
- Smoking while using this medication may increase your risk of blood clots

How should I use this medicine?

Follow the package directions provided by Belmar Pharmacy and by your prescriber. Your dosage is based on your medical condition and response to therapy.

Oral dosage forms may be taken with or without food. If it upsets your stomach take it with a small meal. This medication may cause drowsiness and may be recommended for bedtime dosing. Follow the dosing schedule provided carefully.

Sublingual formulations should be placed under the tongue or between the cheek and gum and held in place until fully dissolved. Avoid swallowing saliva to ensure best absorption into the blood stream. Avoid eating or drinking 15 minutes before or after taking sublingual formulations.

Topical products can be applied to the inner arm, upper thigh, back of the knee, tops of the feet, and inner wrists. It is recommended to rotate sites to ensure even retention of the hormone. Cover treated skin with clothes to avoid contact with people or pets.

Vaginal preparations should be inserted using your finger or the applicator provided. Suppositories may leak and may be more convenient to use at bedtime.

What if I miss a dose?

- If you miss a dose, take it as soon as possible.
- If it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule.
- Do not take double the dose at once.

What should I watch for while using this medicine?

Belmar Pharma Solutions recommends yearly checkups with your provider including, but not limited to, a hormone level test, PAP smear, and mammogram.

What side effects may I notice from receiving this medicine?
