

Testosterone Compound

Published: March 1, 2026

What is Testosterone Compound?

Testosterone (tes-TOS-ter-one)

- Testosterone is a sex hormone derived from yams and may be given to patients who no longer produce a sufficient amount on their own.
- It may be used to reduce the symptoms of hypogonadism (erectile dysfunction, infertility, decrease in beard and body hair growth, decrease in muscle mass, development of breast tissue, or loss of bone mass).
- It may also be used for other conditions as determined by your doctor.
- **Testosterone is an anabolic steroid and a controlled substance.**

Compounded Drug Forms: tablet, capsule, fast-burst sublingual tablet, troche, suspension, suppository, cream, gel, pellet.

What should I tell my health care provider before I take this medicine?

- Allergy to testosterone
- Have breast or prostate cancer
- Have heart disease, kidney disease, or liver disease
- Pregnant or may become pregnant; are breastfeeding
- Have depression, anxiety, or other mood disorder

How should I use this medicine?

Follow the package directions provided by Belmar Pharma Solutions and by your prescriber. Your dosage is based on your medical condition and response to therapy. Follow the dosing schedule provided carefully.

Oral dosage forms may be taken with or without food. If it upsets your stomach take it with a small meal.

Sublingual formulations should be placed under the tongue or between the cheek and gum and held in place until fully dissolved. Avoid swallowing saliva to ensure best absorption into the bloodstream. Avoid eating or drinking 15 minutes before or after taking sublingual formulations.

Topical products can be applied to the inner arm, upper thigh, back of the knee, tops of feet and inner wrists. It is recommended to rotate sites to ensure even retention of the hormone. Cover treated skin with clothes to avoid contact with people or pets. Wash hands after applying the product. **Significant risk of secondary exposure to people in close contact, specifically children.**

Vaginal preparations should be inserted using your finger or the applicator provided. Suppositories may leak and may be more convenient to use at bedtime.

What if I miss a dose?

- If you miss a dose, take it as soon as possible.
- If it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule.
- Do not take double the dose at once.

What should I watch for while using this medicine?

Belmar Pharma Solutions recommends yearly checkups with your provider including, but not limited to, a hormone level test, periodic liver and renal function tests, hemoglobin and hematocrit, and lipid panel. Monitor blood pressure regularly.

What side effects may I notice from receiving this medicine?

Possible side effects that may occur and may go away as your body gets used to the medication include:

- Headache
- Changes in hair growth
- Emotional instability
- Voice deepening
- Changes in taste
- Acne
- Irritation at the site of topical application

- Diarrhea
