

What is this medicine?

Dehydroepiandrosterone (de-hydro-EPEE-an-draw-stir-own) DHEA

- DHEA is a hormone that may be given to men and women who no longer produce a sufficient amount on their own.
- It may also be used for other conditions as determined by your doctor.

Compounded Drug Forms: BLA tablet, sublingual tablet, fast-burst sublingual tablet, vaginal tablet, troche, vaginal suppository, cream, gel

What should I tell my health care provider before I take this medicine?

- Allergy to DHEA
 - Any genital cancers such as breast, prostate and uterine cancers
 - Pregnant or breastfeeding
 - Use with caution in people with hirsutism or acne.
-

How should I use this medicine?

Follow the package directions provided by Belmar Pharmacy and by your prescriber. Your dosage is based on your medical condition and response to therapy. Follow the dosing schedule provided carefully.

Oral tablets may be taken with or without food; if it upsets your stomach take it with a small meal.

Sublingual tablets and fast-burst sublingual tablets should be placed under the tongue or between the cheek and gums and held in place until fully dissolved. Avoid swallowing saliva to ensure best absorption into the blood stream. Avoid eating or drinking 15 minutes before or after taking sublingual tablet.

Topical products can be applied to the inner arm, upper inner thigh, backs of the knees, tops of the feet and inner wrists. It is recommended to rotate sites to ensure even retention of the hormone.

Vaginal tablets or suppositories should be inserted using your finger or the applicator provided. Suppositories may leak, and may be more convenient to use at bedtime.

What if I miss a dose?

- If you miss a dose take it as soon as possible.
 - If it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule.
 - Do not take double the dose at once.
-

What should I watch for while using this medicine?

Belmar Pharmacy recommends yearly checkups with your provider.

What side effects may I notice from receiving this medicine?

Possible side effects that may occur and may go away as your body gets used to the medication include:

- Acne
- Hair growth or loss
